IIL LAUNCHES UPMM™ SUITE OF KNOWLEDGE MANAGEMENT SOFTWARE TOOLS

Unified Project Management® Methodology Solutions Now Available for Individuals and Small Groups

New York, NY, September 24, 2008 – In an effort to address the increased business demands of small and mid-sized organizations, International Institute for Learning, Inc. (IIL), recently announced that it has expanded its customizable UPMM™ knowledge management solution to a suite of tools that now includes solutions for small groups and single-users.

UPMM tools are process-based, interactive roadmaps that deliver all the knowledge resources required for managing projects effectively. The latest suite of tools includes: *UPMM™ Standard Edition*, *UPMM™ Professional Edition*, and *UPMM™ Enterprise Edition*. Employed by a wide range of companies from various industries, UPMM tools are scalable for use in projects of any type and size and the customization features enable users to define their own project life cycle and project management methodologies. Addressing all areas of enterprise project management, each UPMM tool offers project management guidelines, processes, templates for each of the inputs and outputs of the process, examples of best practices, and the ability to create a project management community of practice. UPMM is also the first to include the international standard for project management – Project Management Institute's *PMBOK® Guide*.

“Knowledge management is critical to project management performance,” stated IIL’s President and CEO, E. LaVerne Johnson. “It empowers project managers with the information and capability to perform their role effectively. IIL’s UPMM solutions include both knowledge management functionality and a full project management methodology. To meet the needs of businesses of all sizes, we have created new tools accessible to small groups and single-users for this solution, which provides access to the entirety of the software’s easy-to-use project management knowledge base.”

Until now, IIL has made UPMM available only to companies under unlimited or limited licensing agreements for a sizable number of their employees. The *UPMM Standard Edition* and *Professional Edition* allow companies to access each product without the use of a dedicated server, eliminating the cost of installing, administering and trouble-shooting a server, and maintaining its database.

The UPMM suite is an asset to any project manager and organization. In addition to using UPMM as a practical work aide, project managers can reinforce training, prepare for certification exams and quickly access templates, glossaries and other relevant project management tools.

For more information about the UPMM suite of tools and to learn how you can immediately leverage these solutions, please visit www.iil.com/pm/upmm/ or contact Christian Damiba, PMP, Director of On-Demand Products and Programs at +1 (212)515-5150 or +1 (800)325-1533, email: upmm@iil.com.

About International Institute for Learning, Inc.

International Institute for Learning, Inc. (IIL) is a global leader in professional training and comprehensive consulting services in the areas of Project, Program, and Portfolio Management, PRINCE2™, Business Analysis, Microsoft® Office Project and Project Server, and Lean Six Sigma. In addition to its many courses, productivity tools, and professional certification pathways, IIL leads the way in customized course development. Its Many Methods of Learning™ enable IIL companies in more than 17 major countries around the world to deliver innovative, effective, and consistent training solutions through a variety of learning pathways (live virtual classroom, traditional classroom, on-demand and a blended approach). IIL is an IIBA endorsed education provider, a PMI® charter global registered education provider, a member of PMI's Silver Alliance Circle member, and PMI's Corporate Council.
