International Institute for Learning Gains PRINCE2® Accredited Training Organization (ATO) Status

Global Leader in Project Management Joins Select Group of Organizations Authorized to Provide PRINCE2 Training

New York, NY – July 24, 2009 – International Institute for Learning, Inc. (IIL) has announced that effective immediately the company is now an Accredited Training Organization (ATO) for the delivery of PRINCE2 courses and programs. A global leader in Project, Program, and Portfolio Management, Microsoft® Office Project, Lean Six Sigma, and Business Analysis corporate learning solutions, IIL's newest accreditation will enable the company to offer an even wider portfolio of project management training for its clients worldwide.

PRINCE2 is a proven, process-based approach for project management that provides an easily tailored and scalable method for the management of all types of projects. The method is the de-facto standard for most UK businesses and is practiced worldwide. To attain this accreditation, IIL underwent a comprehensive approval process to ensure the company satisfied specific criteria set out by The APM Group, the accreditation, certification, and qualification organization for PRINCE2.

"IIL sought accreditation from The APM Group after careful consideration of how to best serve our global client base. We are confident that IIL's PRINCE2 course offerings will provide our clients with a proven, time-tested methodology to enhance their day-to-day operations," said E. LaVerne Johnson, Founder, President, and CEO of IIL. "We see PRINCE2 working very well with the *PMBOK® Guide* in one of two ways: either by providing a proven, best-practice project lifecycle for companies seeking an alternative to developing a methodology themselves; or by complimenting a company's pre-existing *PMBOK® Guide*-based lifecycle with a rigorous approach to managing the Business Case, Quality, the Project Organization and overall control of the project. The combination of the *PMBOK Guide®* and PRINCE2 is a powerful recipe for project success."

She added, "Our successful completion of the rigorous accreditation process demonstrates our passion for and dedication to meeting the evolving needs of project professionals worldwide."

Richard Pharro, CEO, The APM Group, said, "We'd like to extend a warm welcome to IIL as it joins the select group of organizations authorized to provide PRINCE2 training. The ATO accreditation is a mark of quality for learning providers and acts as a testament to the depth and quality of IIL's course offerings. For global organizations operating in increasingly competitive international markets, the adoption of PRINCE2 as a proven project management methodology can make a significant contribution to successful project delivery."

IIL currently offers the PRINCE2 Foundation course and the PRINCE2 Practitioner course.

IIL also offers courses in Managing Successful Programmes (MSP™) and Management of Risk (M_o_R®).

In addition to being a PRINCE2 Accredited Training Organization, IIL is an IIBA endorsed education provider and a PMI® charter global registered education provider.

IIL's mission is to embody its three key values – **Intelligence, Integrity and Innovation** – in empowering individuals and organizations to advance their skills and abilities, increase collective knowledge and capabilities, and operate more efficiently and effectively.
