AI Frontiers 2025: The Future is Now

OPENING KEYNOTE

Scaling Enterprise AI.. beyond the hype

Shobhit Varshney (*IBM Consulting*)

This session explores the evolving landscape of AI and Generative AI (GenAI), highlighting the key challenges enterprises face in adoption, and examples of how clients are mitigating those. We will delve into strategies for deploying AI responsibly at scale, analyzing workflows to infuse AI, GenAI, and automation effectively, and the shift from fixed workflows to intelligent AI agents. Finally, we will address the critical role of trust, transparency, and governance in ensuring ethical AI deployment across organizations.

PANEL DISCUSSION

AI in Action Across Industries

Artificial Intelligence is rapidly transforming industries, redefining how organizations innovate, operate, and compete. This expert panel brings together leading AI specialists to explore the latest trends and their impact across key sectors, from education and corporate training to project management and global business strategy. Panelists will discuss real-world applications, challenges, and the evolving role of AI in shaping the future of work, leadership, and organizational culture.

Dr. Leon Herszon
(*IIL Consulting*)

Jim Boland
(*IBM*)

Dr. André Barcaui
(*Author & Professor*)

Gracey Wilson
(*Microsoft*)

AI Frontiers 2025: The Future is Now

PRESENTATION

Transforming Business with AI

Andrew Scott (Google)

AI is revolutionizing industries, driving efficiency, innovation, and competitive advantage. In this keynote, Andrew Scott, a leading expert in AI transformation, will explore how businesses can harness the power of AI to optimize operations, enhance decision-making, and unlock new opportunities. With a particular focus on healthcare and logistics, he will share real-world insights on the practical applications of AI, its impact on workforce dynamics, and strategies for seamless AI integration across industries.

2025 - The Year of AI Agents

Terry Neal (Cyberskills)

As AI agents become increasingly sophisticated, they are transforming how businesses operate, automate, and innovate. In this keynote, Terry Neal, a global leader in AI and cybersecurity training, will explore the evolving landscape of AI agents, from personal assistants to task-specific applications. Attendees will gain a clear understanding of when AI agents can drive value, when their use might be excessive, and how to design effective agentic applications to enhance productivity and decision-making.

PANEL DISCUSSION

The Future of AI: Insights from the Next Generation

What does the future of AI look like? In this dynamic panel discussion, emerging leaders in AI will share their insights into how artificial intelligence is transforming industries, reshaping user experiences, and driving innovation. From user-centric design to enterprise-level program management, panelists will discuss how organizations can embrace AI while maintaining a focus on diversity, inclusion, and responsible implementation.

**Nelly Wilson
(Google)**

**Rudraksh Saxena
(BAE Systems)**

**Lauren Slyman
(Microsoft)**

**Othul Hock
(IBM Consulting)**
